WHITE PINE BLISTER RUST CONTROL

In 1967, 145 towns and cities appropriated approximately $18,666.70 to advance the control program in their communities. This sum, combined with state and federal cooperative funds, enabled us to cover 202,475 acres of control area. This splendid cooperation, an indication of the towns' continued confidence in the statewide control program, is most heartening.

Recognizing the towns' fiscal problems, the Division's appropriation requests are kept to minimum amounts necessary to maintain the present status of control.

The importance of the Blister Rust Control Program is evidenced by the prominent place white pine holds in our state economy – 1. approximately 70% of all lumber cut in New Hampshire is white pine; 2. 17% of our New Hampshire labor force is sustained by revenue derived from white pine timber sales, woods operations, the manufacture and sale of hundreds of white pine products. All of this was endangered by the advent of the destructive White Pine Blister Rust Disease.

New Hampshire faced a most difficult task, that of marshalling forces to combat the rust. It had the largest control area in the United States – 2,500,000 acres. To meet the situation, town, city, state and federal forces combined in a unique effort. All government agencies contributed funds to finance the project. The State was assigned the responsibility of directing the field work. These arrangements are still in force. The combined effort has been successful. Control of the disease has been established on 98.7% of the entire control area. Our problem is to hold the line and maintain the hard-earned control status by periodic examination of control areas to determine the recurrence of currant and gooseberry bushes and, when found, destroy them. Continued cooperation on the part of towns and cities is essential to the achievement of this goal.

Conforming to our yearly custom, there has been prepared, and is attached herewith, a statement briefly summarizing accomplishments, and expenditures of town, state and federal funds.

In our financial statement, the amount reported as "Cooperative Aid" covers not only expenditures for actual ribes eradication, but

also state and federal funds spent in – 1. detailed mapping and inspection of areas prior to actual control work, 2. research work that has reduced the size of the control area, and 3, research in control methods to reduce costs of control work. The mapping survey provides a permanent record which is of great value in planning future examinations and workings of white pine stands in your community.

Because details of control work can vary in communities, it is not possible to cover all in a brief statement. However, the supervisor of the control project in your town will, in the course of his planned public relations work, contact you and members of your Board in the near future to discuss the present status of the project and his future plans as it pertains to your community.

Thanking you for your past and continuing cooperation, I remain,

Very truly yours,
Theodore Natti, Director
Division of Resources Development

REPORT OF THE DOG OFFICER

Of interest to the citizens of the Town of Barrington, is the action taken by the last Legislature to strengthen the dog nuisance law (RSA 466:31).

Under this law, any person who considers a dog a nuisance or menace to persons and property may make a complaint to any law officer or Selectman. Such officers must investigate within three days.

If the complaint is sustained they must order the owner or keeper of the dog to abate the nuisance by having a certified copy of the order delivered to him. The owner has 10 days to petition the district or municipal court for review. Meanwhile he must restrain his dog else face a fine up to $25 and surrender custody of the dog to the Police for such disposition as the Court may order.

This is a state law and your town officers are obligated to enforce it.

Many persons may for reasons of their own, take advantage of the law and their neighbors, however we feel you are all reasonable people and will make an effort to control your pets.

This year, over 700 dogs from Barrington and the surrounding communities were vaccinated under the new Rabies Act (466:1).

We had one serious case of running dogs killing a large number of turkeys at Mr. W. Haley's. We tracked them until we lost all clues as to their whereabouts. Again we stress that you keep control over your dogs at all times.

23 Strays were picked up and taken to the veterinarian for disposal.

Two stray dogs were picked up and returned to their owners.

We assisted the State Fish & Game Dept. in tracking 8 dogs running deer.

And finally, we assisted the Town Clerk in collecting approximately 50 delinquent dog permits.

REPORT OF THE LAKES REGION ASSOCIATION

As the Lakes Region Association enters its thirty-third year of service to the thirty-one towns and three cities it represents, we face the annual task of appeal to our communities for support of their association. Regional cooperation in economic development as practiced by the Regional Associations in New Hampshire, was once most unique, but now several other states have watched the fruits of our efforts and have adopted a similar program for their state. We present herewith our request for your consideration in the preparation of your town's 1968 Budget.

An investment in the future development and promotion of the Lakes Region equal to 1/100 of 1% of the assessed valuation is the basis of our request to each town and city for the 1968 budget of our Association.

Your Association becomes the catalist in coordinating action between the state agencies and the local communities, so that the greatest benefits from research, planning, development and promotion can all be realized in our Region.

We certainly hope that your municipality will participate in support of the Lakes Region Association, for it is with the united support of all shoulders to the wheel, that the wheel of progress turns.

REPORT OF FOREST FIRE WARDEN & DISTRICT CHIEF

After several successive years of drought, the rains of 1967 came as a welcome change. Our record of the past fire season is good. Our thanks to all who contributed to achieve this good record. Continued improvement in the matter of accurate, prompt detection and rapid effective suppression action can help to maintain this good, worthwhile record even though we do not have an abundance of rain as in the fire season of 1967.

It will help if we follow these simple suggestions:

1. No burning of debris and waste between the hours of 9:00 A.M. and 5:00 P.M. and then only with a written permit from the Forest Fire Warden.
2. Take debris and waste to the town dump.
3. Maintain a clean, safe dump.
4. Keep matches away from young children.
5. Be sure matches and smoking material are dead out when we discard them.
6. Set a good example for others in fire prevention.

REPORT OF THE SUPERVISORS OF THE BUILDING CODE

Based on requests we have received for building permits, construction in Barrington is dropping slightly. Trailers to be used as mobile homes, on the other hand, are on the increase.

Permits Issued in 1967

No. Issued	Description	Value Estimated
12	New Homes	$148,700.00
20	House Trailers	68,866.45
17	Summer Camps	58,482.00
8	Garages	8,379.00
14	Additions to Existing Houses	20,177.75

3	Reconstruction to Old Buildings	5,275.00

New Legislative Acts associated with control of water pollution have to a great degree, put a crimp in new non-resident building. Chapter 147 (HB 111) requires the State Water Pollution Commission approval of all sanitary disposal systems within 1,000 feet of Public Water. This in effect takes control of placement of septic systems out of the control of the local government and during the initial period of State involvement, certain hardships have been created for those wishing to build. It is hoped that the State will have a better system in 1968 for processing applicants and that the Legislature in 1969 will make some realistic modifications to the Pollution Laws to make them bearable.

AUDITORS' REPORT

We have examined the accounts for the fiscal year ended December 31, 1967 of all Town officials charged with the custody, receipt and disbursement of public funds. Included in the examination and audit were the accounts and records of the Board of Selectmen, Treasurer, Tax Collector, Town Clerk and Trustees of Trust Funds.

The two fundamental purposes of auditing are:

First: To determine whether all revenues to which the town is entitled have been collected and turned in to the Treasurer, or properly verified as outstanding accounts.

Second: To determine whether all expenditures have been properly authorized and are supported by appropriate invoices or payrolls.

With these two goals before us and following the instructions and suggestions set forth by the State Tax Commission, the vouchers and cancelled checks were compared with supporting invoices and payrolls as well as entries in the books of record. Receipts were checked by source insofar as possible and totals of receipts and expenditures verified. Book balances were verified by comparison with reconciled bank balances made from statements obtained from depository banks.

There were no discrepancies or irregularities in any account and the Town officers and bookkeeper are to be commended for the courtesy and cooperation extended to us.

Considerable work has been done by two separate committees in exploring the AREA concept with Dover and Rochester. In order to ensure secondary education for the children of Barrington, it should continue these studies until some formal agreement has been reached amicable to all concerned.

The last 5 years have shown an emergence of a new militancy on the part of school teachers in the United States. Our daily newspapers feature front page headlines reporting teacher strikes or sanctions across the nation.

Direct negotiations in education with school boards is becoming more and more popular in New Hampshire. By collective negotiation is meant a process whereby the teachers choose an organization to represent them. This organization meets together with the school board. The two together and jointly set and determine the salaries and working conditions of the teachers in that school district. This is a bilateral decision making process as opposed to a unilateral decision making process. The agreements that are reached in negotiations are put in a form of a written document signed by both parties. The New Hampshire Association of School Administrators has adopted a legal form to be used in New Hampshire.

The reason for the above description of collective negotiation is to make the general public aware of what they may face in the future, for example that as of this writing, some of the immediate goals of the NHEA are as follows: a base starting salary of $5,600, improved working conditions, increased sick leave, partial payment of group, life and health insurance, a signed professional negotiations agreement, etc.

In closing we would like to express our appreciation for the cooperation from the School Board, teachers, children, and citizens of the community given to this office in the past year. We will need your continued cooperation for the best interest of the boys and girls in your schools.

Respectfully submitted,

RAMON MARTINEAU, Superintendent

Business Administrator

REPORT OF THE PRINCIPAL

To the Superintendent of Schools:

The current school year began September 1967 with a record enrollment of 305 pupils. As other school districts, Barrington is experiencing rapid growth in its school age population. While rapid growth is desirable in many respects, it poses new problems which require new solutions. Physical education, remedial reading, special education and guidance are areas which would be of considerable benefit to the pupils. The future of the seventh and eighth grades is, at this time, undecided. It would seem that the solution would be either entrance into an AREA School Compact or expansion of the present school faculties.

Pressing as these problems are, my first year as your principal has been encouraging. Fortunately we have added to our audio-visual equipment which expands and makes more graphic the educational experience of the pupils. Such equipment has little value unless handled by a competent faculty which we possess. The receptive attitude of these teachers, school board members, and interested townspeople toward accepting the need for change in our school system has been gratifying.

Respectfully,
Barry Clough

REPORT OF THE SCHOOL NURSE

To the Superintendent of Schools:

The school health services in Barrington, Epsom, Northwood, Nottingham and Strafford included a routine health inspection of each child by the nurse. The parents were informed whenever defects were found, and most of these children were seen or treated by their family physician. The success of the health program depends largely upon such cooperation as the parents of these communities have shown.

In addition to the above, various clinics were arranged for the benefit of the children. Measles vaccine was given to 78 children in Barrington and to 49 in Strafford. Epsom joined with Chichester in having a measles clinic and a combined total of 22 children received this protection.

A series of three immunization clinics was held in both Northwood and Nottingham. In Northwood, 42 measles vaccinations, 18 smallpox vaccinations, 105 triple toxoid boosters and 24 oral polio immunizations were given; while in Nottingham 142 children received triple toxoid, 22 were vaccinated for smallpox, 55 for measles, and 134 for polio (both series and boosters).

Dental clinics were held in three towns – Barrington, Epsom, and Northwood. The former participated in the Matching Funds Program only. Dental repair work was provided for 11 children. Epsom and Northwood also had this program and a total of 35 children was treated. These two towns also have a continuing dental program for cleaning the teeth and applying topical fluoride solution which is very beneficial in reducing dental decay. 199 children took advantage of this program in Epsom and 144 in Northwood.

Regarding clinics, it should be remembered that all immunization clinics are co-sponsored by the N.H. Bureau of Public Health and a local organization. The dental clinics are also co-sponsored by the N.H. Bureau of Dental Public Health and one or more local sponsors. The local groups deserve a special word of commendation, since a great deal of time and effort is essential to the smooth operation of any clinic.

Through the N.H. Tuberculosis Association, the Heaf test for tuberculosis was administered to 239 students and faculty members at Epsom Central School, and 6 people received X-ray examinations. It is planned in the future to administer the Heaf test annually to children in first grade only. This will be done in all five towns in the fall of 1968.

During the school year of 1966-67, the N.H. Sight Conservation Program provided vision examinations and glasses for 3 students, and the Concord chapter of the Lions Club took care of an equal number.

I would like to take this opportunity to thank all of you who helped in making the school health service so successful.

Respectfully submitted,
Dorothy Y. Wells, R.N.
School Nurse
